# RELIABLE RUN TICKETS

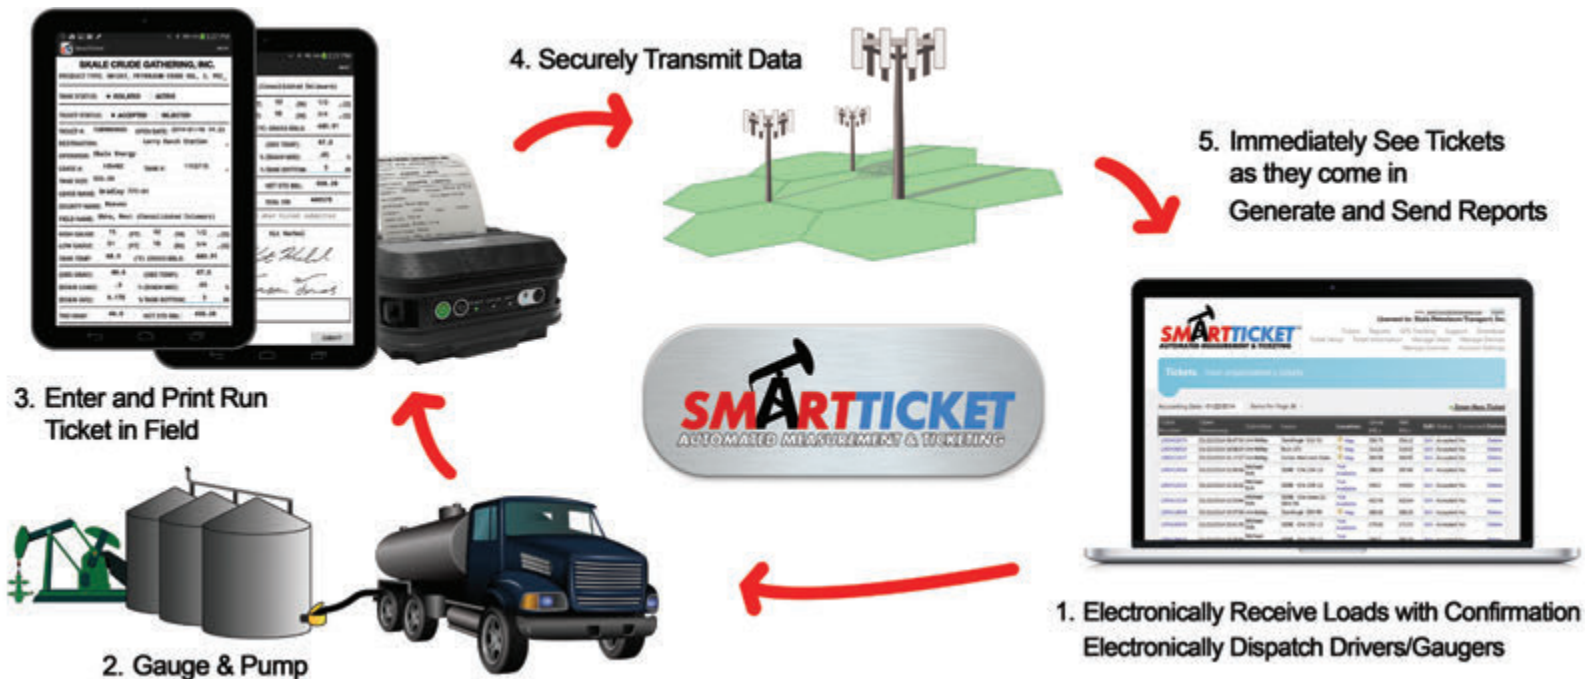

## BRING YOUR OPERATION INTO THE 21<sup>ST</sup> CENTURY

**SKALE Technologies™ SmartTicket™** is our game-changing transport automation platform that provides real-time business intelligence for streamlining field operations. Know where your assets are in the field, **know that the amount unloaded is the same as the amount loaded.**

**SmartTicket** provides an end-to-end automated ticketing solution that **eliminates human error** and delay of decision-driving information.

**Move product today, generate and send reports in real-time, get paid faster.**

### How SmartTicket Works

# REAL-TIME REPORTS

## INTELLIGENT, EASY-TO-USE TOOLS

PIPELINES

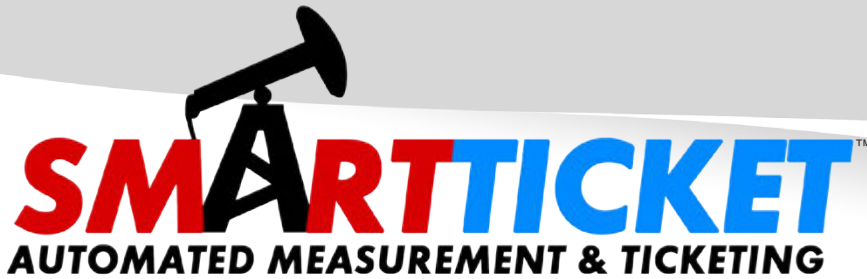

WATER HAULERS

CRUDE HAULERS

PETROLEUM TRANSPORT

## Features & Benefits

- Track transfer of products and assets in real-time as they are loaded and unloaded
  - Know how much product is in motion
  - Know who is moving your product
  - Know when the product is loaded and unloaded
  - Know where these transactions are taking place using GPS and integrated mapping
- Automatically calculates volumes & quantities – Improve operational efficiency and eliminate human error
- Prints run tickets and bill of lading at vehicle when loading/unloading is completed – DOT compliant
- Detect theft and loss of product – Verify that the amount unloaded is the same as the amount loaded
- Easy-to-Use – Information is available from any computer, smartphone, or tablet 24/7 via a web console
- Useful reports – Analyze driver/operator productivity and maximize asset utilization for excellent ROI
- Maximum security – Military-grade encryption on all communications and web console
- All data accessible via optional Web Service API – Integrate **SmartTicket** with other enterprise applications

## YOUR DISPATCHER'S NEW BEST FRIEND

- Electronically notifies dispatch – No more missed loads due to missed calls, text messages, or faxes
- Let pumpers send loads to your dispatchers directly from their smartphone (iPhone & Android)
- No more confusion or complaints about missed or extra pickups
  - Only lets pumpers send loads for tanks you have contracts for
  - Automatically sends load and dispatch confirmation with tracking number
  - Gives dispatch and pumpers instant communication and keeps history
- Useful reports – View history of loads to optimize schedules, routes, and more – maximize ROI
- Maximum security – Military-grade encryption on all communications and web console
- Can be used as standalone dispatching system if you're not ready to automate your entire operation with all features of SmartTicket
